

The feed that books the holiday.

Travidz is short-form travel video where every clip is bookable in two taps. TikTok-native discovery, Booking.com-native economics.

Seed raise · £2.5M SAFE · 18-month runway

Every category got its TikTok moment. Travel's is now.

\$250B

Creator economy in 2025, up from \$210B in 2024.

62%

of social-led trip planners make a specific booking decision after viewing creator content.

\$15T

Leisure travel opportunity by 2040 — no native social-commerce winner yet.

Travidz is the first product built for the moment travellers stop scrolling and start spending.

Discovery lives on social. Booking lives somewhere else.

Travellers find the trip on TikTok and Instagram.

Then they leave: open Google → search the hotel → check Booking → compare on Trivago → return to the original creator.

Result: the intent leaks. Creators don't get paid for the booking they caused. Operators bid for the same clicks twice. Travellers pay the inefficiency tax.

39%

of global travellers source trip ideas from social platforms.

3 tabs · 8 min

avg. journey from inspiration to booking today.

One feed. One tap. One transaction.

01

Scroll

Vertical creator video feed of real hotels, beaches, restaurants, tours.

02

Tap

The deal card surfaces inline — price, dates, what's included, in the creator's voice.

03

Book

Native checkout. The creator earns. The business pays one flat 8% commission. The traveller gets the deal they saw.

TikTok UX. Booking.com economics. One product.

Three lines crossed in 2025.

AUDIENCE

Gen Z + Millennials

are now the majority of leisure travel spending — and they shop where they scroll.

BEHAVIOUR

Short-form video

is the default discovery surface — but no traveller wants to copy-paste a hotel name into a second app.

SUPPLY

Operators want creators

but lack a clean attribution and payout rail. Travidz is that rail.

Built mobile-first. Designed to convert.

8%

blended commission to Travidz

92% to operator · creator keeps a tapered share by tenure

Tier	Creator	Travidz
Founding (first 500, life)	50%	50%
Power (£25k rolling 12mo)	50%	50%
New (months 0–6)	50%	50%
Maturing (months 7–18)	40%	60%
Mature (19+ months)	30%	70%

As the cohort matures, blended Travidz take-rate glides from 4.0% → 4.65%.

A flywheel that gets more efficient as it scales.

Founding 500

Recruit the first 500 UK travel creators. Lifetime 50% commission. They post; their audience converts; supply seeds demand.

PHASE 2 · SCALE

Month 6 → 18

Power tier unlocks

Creators crossing £25k rolling-12mo GBV lock at 50% forever. Every unlock becomes a recruiting asset.

PHASE 3 · DEFEND

Month 18 → 36

Operator pull

Hotels and DMOs proactively onboard for distribution. CAC drops; blended take-rate climbs as the cohort matures.

Prove → Scale → Defend.

Each phase has a raise, a measurable gate, and a defensibility milestone.

DEFENSIBILITY

Two-sided network effects; switching cost for creators & operators.

No one owns the top-right quadrant. Yet.

Travel OTAs sit bottom-left (booking but not social).

Social platforms sit top-right (social but not bookable).

Travidz is the only product native to both.
