

TRAVIDZ

Seed round · Confidential

The feed that books the holiday.

Travidz is short-form travel video where every clip is bookable in two taps. TikTok-native discovery, Booking.com-native economics.

Seed raise · £2.0M · 18-month runway

Every category got its TikTok moment. Travel's is now.

\$250B

Creator economy in 2025, up from \$210B in 2024.

62%

of social-led trip planners make a specific booking decision after viewing creator content.

\$15T

Leisure travel opportunity by 2040 — and no native social-commerce winner yet.

Travidz is the first product built for the moment travellers stop scrolling and start spending.

THE PROBLEM

Discovery lives on social. Booking lives somewhere else.

Travellers find the trip on TikTok and Instagram.

Then they leave: open Google → search the hotel → check Booking → compare on Trivago → return to the original creator.

Result: the intent leaks. Creators don't get paid for the booking they caused. Operators bid for the same clicks twice. Travellers pay the inefficiency tax.

39%

of global travellers already source trip ideas from social platforms.

3 tabs, 8 min

avg. journey from inspiration to booking today.

One feed. One tap. One transaction.

01

Scroll

Vertical creator video feed of real hotels, beaches, restaurants, tours.

02

Tap

The deal card surfaces inline — price, dates, what's included, in the creator's voice.

03

Book

Native checkout. The creator earns. The business pays one flat 8% commission. The traveller gets the deal they actually saw.

TikTok UX. Booking.com economics. One product.

Three lines crossed in 2025.

AUDIENCE

Gen Z + Millennials

are now the majority of leisure travel spend, and they shop where they scroll.

BEHAVIOUR

Short-form video

is the default discovery surface — but no traveller wants to copy-paste a hotel name into a second app.

SUPPLY

Operators want creators

but lack a clean attribution and payout rail. Travidz is that rail.

Built mobile-first. Designed to convert.

TAM

UK + EU-5 leisure travel GBV

£343B

UK £87.6B · EU-5 (FR/DE/ES/IT/NL) £255B

SAM

Creator-influenced × bookable component (80%)

£82.9B

UK £23.2B · EU-5 £59.7B

SOM

Travidz Year-5 GBV (base case)

£444M

24,000 active creators · £18,500 GBV / creator / yr

Y5 SOM = 1.76% of UK SAM. Credible bottom-up capture from the financial model.

BUSINESS MODEL

8% to Travidz. Split with the creator who drove the booking.

EVERY BOOKING

8%

blended commission to Travidz

92% to operator

Of the 8%, the creator keeps a tapered share by tenure. The rest is Travidz revenue.

Tier	Creator	Travidz
Founding (first 500, life)	50%	50%
Power (£25k rolling 12mo)	50%	50%
New (months 0-6)	50%	50%
Maturing (months 7-18)	40%	60%
Mature (19+ months)	30%	70%

As the cohort matures, blended Travidz take-rate glides from 4.0% → 4.65%.

Live, instrumented, and accelerating.

[creators]

[geos]

Live destinations

A flywheel that gets more efficient as it scales.

24,000

active creators

£444.0M

annual GBV

£20.7M

Travidz net revenue

4.65%

blended take-rate

Why it compounds:

Power-creator tier (£25k rolling 12-mo GBV) locks supply: high-GBV creators stay at 50% forever.
Maturing cohort (60% of GBV by Y5) silently lifts Travidz net per booking — no price change to anyone.
8% gross commission stays the same to operators throughout. Predictable for partners, expanding for us.

Founding Creators → flywheel → category default.

PHASE 1 · PROVE

Now → Month 6

Founding 500

Recruit the first 500 UK travel creators. Lifetime 50% commission. They post; their audience converts; supply seeds demand.

PHASE 2 · SCALE

Month 6 → 18

Power tier unlocks

Creators crossing £25k rolling-12mo GBV lock at 50% forever. We celebrate them publicly — every unlock is a recruiting asset.

PHASE 3 · DEFEND

Month 18 → 36

Operator pull

Hotels and DMOs proactively onboard for distribution. CAC drops; blended take-rate climbs as the cohort matures.

Prove → Scale → Defend.

Each phase has a raise, a measurable gate, and a defensibility milestone.

1

PROVE

M0–18 · Seed £2M

UK-only. Founding-500 lock-in.

Exit gates

2,400 creators
£44M GBV
4.12% take-rate
100 power-tier locks
250 verified operators

Defensibility

Founding-500 locked at 50% for life — irreversible supply moat.

2

SCALE

M18–44 · Series A £8M

EU-5 rollout. Paid-UA flywheel.

Exit gates

14,000 creators
£259M GBV
4.72% take-rate
£12M ARR

Defensibility

First-mover in EU-5 creator-led booking. Power-tier population compounds.

3

DEFEND

M44–60+ · Series B £20M

Platform moat. US optionality.

Exit gates

24,000 creators
£444M GBV
4.65% blended take
Category default in UK + EU-5

Defensibility

Two-sided network effects; switching cost for creators and operators.

No one owns the top-right quadrant. Yet.

Travel OTAs sit bottom-left (booking but not social). Social platforms sit top-right (social but not bookable). Travidz is the only product native to both.

TEAM

Operators, builders, and the people who book the holidays.

[Founder Name]

CEO & Founder

Product, growth, [prior company]. Built [X] from zero to [Y].

[CTO Name]

CTO

Engineering leadership at [prior company]. Owner of platform & data.

[Head of Supply]

Head of Operator Supply

Travel-industry distribution lead. Owns hotel/DMO partnerships.

[Advisor]

Advisor

Senior leader at [TikTok/Booking/Airbnb] — creator-monetisation playbook.

£2.0M Seed for 18 months. Then Series A on real GBV.

40%

Creator GTM & founding-500 programme

35%

Engineering: feed, search, ranking, payments

15%

Operator supply & destination expansion

10%

G&A, legal, compliance

PHASE 1 · PROVE — 18-MONTH GATES

2,400+ active creators (Y2 base)
£44M annualised GBV run-rate
Power-tier programme: 100+ creators locked at 50%
250+ verified operator partners
Blended take-rate climbing past 4.1%

These unlock a Series A on demonstrated unit economics, not assumed ones.

Every category had its TikTok moment. Travel's is now.

Let's not be the round you tell people about in five years.
